Introduction and background

Chapter 1

Introduction

Hello world!

I'll just put a citation here so we can see how the bibliography looks like Rogge (1989).

Hello, here is some text without a meaning. This text should show, how a printed text will look like at this place. If you read this text, you will get no information. Really? Is there no information? Is there a difference between this text and some nonsense like »Huardest gefburn«. Kjift – Never mind! A blind text like this gives you information about the selected font, how the letters are written and the impression of the look. This text should contain all letters of the alphabet and it should be written in of the original language. There is no need for a special contents, but the length of words should match to the language.

Conclusion and outlook

Chapter 2

Conclusion

And now we have a nice latex template.
Future work: actually write the thesis.

Appendices

A My additional material

This some material which is not actually strictly necessary. But it's good to know how to number an appendix nicely finally.
